## The Science of Everyday Life Why Teapots Dribble, Toast Burns and Light Bulbs Shine

**Marty Jopson**

### Keynote

*The One Show* presenter and all-round Science Bloke Marty Jopson has the answer to all of these, and many more, baffling questions about the chemistry and physics of the everyday stuff we use every day.

### Description

**Have you ever wondered why ice floats and water is such a freaky liquid? Or why chillies and mustard are both hot but in different ways? Or why microwaves don't cook from the inside out?**

In this fascinating scientific tour of household objects, *The One Show* presenter and all-round Science Bloke Marty Jopson has the answer to all of these, and many more, baffling questions about the chemistry and physics of the everyday stuff we use every day.

### Sales Points

- Written by Marty Jopson, the presenter of the science and technology sections on *The One Show* on BBC1, a live-show performer, writer and all-round Science Bloke
- A fascinating and accessible guide to chemistry and physics using the everyday objects around us
- Addresses fascinating conundrums such as: How do slinky toys work? Why does wine go off and can you stop it? Why does thunder rumble? and How can boomerangs fly and return to the thrower?

### Author Biography

Marty Jopson has a PhD in Cell Biology and is the resident scientist on BBC One's *The One Show*. Marty has been working in television for eighteen years, since his first job building props, and has been performing stage science around the UK for twenty years. His website is [martyjopson.co.uk](http://martyjopson.co.uk).
